

## Podcast Guest Scheduling & Outline Builder — Requirements Table

| Req ID  | Type       | Description                                                                                                         | Priority | Acceptance Criteria                                                                                                               | Rationale (short)                           | Comments                      |
|---------|------------|---------------------------------------------------------------------------------------------------------------------|----------|-----------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|-------------------------------|
| FR-001  | Functional | The system shall allow the Show Host to share available interview time slots with podcast guests.                   | High     | When the host publishes available slots, the guest can view the available interview times and select one.                         | Enables guest scheduling                    | Core scheduling functionality |
| FR-002  | Functional | The system shall allow a Podcast Guest to select an available interview time slot.                                  | High     | When a guest selects an available slot, it is marked as booked and cannot be selected again.                                      | Prevents scheduling conflicts               | Required for booking          |
| FR-003  | Functional | The system shall allow a Podcast Guest to submit structured bullet points for discussion topics.                    | High     | When the guest submits discussion points, the system stores the topics and associates them with the guest's episode.              | Provides content for the interview          | Core outline functionality    |
| FR-004  | Functional | The system shall allow a Podcast Guest to provide biography links along with the submitted discussion topics.       | Medium   | When valid biography links are submitted, they are stored with the guest's discussion outline and are available for the episode.  | Gives the host guest background information | Supports episode preparation  |
| FR-005  | Functional | The system shall generate timestamped run-of-show episode production notes using the submitted guest topics.        | High     | When guest topics are submitted, the system generates formatted production notes containing the discussion topics and timestamps. | Supports episode production                 | Core output of the system     |
| NFR-001 | Nonfunc.   | The system shall generate the formatted run-of-show production sheet from submitted guest topics in under 1 second. | High     | Benchmarking tests confirm that the formatted production sheet is generated in under 1 second under simulated peak load.          | Ensures fast outline generation             | Performance requirement       |
| NFR-002 | Nonfunc.   | The system shall protect guest and episode information from unauthorized access.                                    | High     | Security testing confirms that only authorized users can access submitted guest topics, biography links, and production notes.    | Protects sensitive episode information      | Security requirement          |

# Use-Case Flow Specification

|                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|----------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Goal           | Generate Timestamped Run-of-Show Notes                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Actor          | Show Host                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| Main flow      | <ol style="list-style-type: none"><li>1. <b>Show Host</b> opens the episode preparation section.</li><li>2. The <b>system</b> retrieves the guest's <b>submitted discussion topics</b>.</li><li>3. The <b>Show Host</b> requests generation of <b>run-of-show notes</b>.</li><li>4. The <b>system</b> organizes the submitted topics into an episode sequence.</li><li>5. The <b>system</b> assigns <b>timestamps</b> to the discussion sections.</li><li>6. The <b>system</b> generates the formatted production notes.</li><li>7. The <b>system</b> displays the generated <b>run-of-show notes</b> to the <b>Show Host</b>.</li><li>8. The run-of-show production notes are ready for episode preparation.</li></ol> |
| Alternate Flow | <p><b>Guest Topics Unavailable</b></p> <p><b>At Step 2, if discussion topics have not been submitted:</b></p> <ol style="list-style-type: none"><li>2a. The system displays a message indicating that guest topics are required.</li><li>2b. The Show Host cannot generate the production notes.</li><li>2c. The Show Host can retry after the Podcast Guest submits the topics.</li></ol>                                                                                                                                                                                                                                                                                                                              |
